Thanks for your purchase of our product: DAMITA HAIR PROCESSOR.

Please read the operation manual before using the product.

Please put the operation manual in the place easy for you to read and you can read it at any time.

## Product Information

Product Name: Damita

Product Code: H012

The Damita is designed with the anion function to assist health care as well as hair care, listed below are the key functions for Damita.

- The anion full-automatic hair drying machine disperses anion to eliminate neutralizing charge on static, frizzy and dry hair also removing dulling particles in the air.
- The anions effect is superior to traditional hair drying machines, the air-out let system can break down and neutralize hair decreasing hair's static electricity, adding moisture as well as maintaining the hairs natural oils, leaving the hair feeling soft, natural and shiny after treatment; taking care not to cause any further damage hair.
- Damita has special health care functions as well as the traditional hair treatments. Once the treatment is complete the hair will be left healthy, soft, glossy and beautiful.

## Assembly Instructions

## Assembly Instructions

Note: Please ensure that the slot on the pole 1 faces the adjustment handle

Note: Please ensure that the head assembly faces the front of the machine correctly.

Fix the head assembly on the pole 1 and tighten it with the screw.

### Technical Description

AC 220-240V	50/60Hz	750W
-------------	---------	------

To get the best results out of this product and to ensure customers comfort, please follow the steps listed below...

Diagram 1

#### Step 1

Damita should be adjusted and placed 6-8cm from the back of the customer's head and 5cm (2") from the rear of the customer's neck.

Diagram 2

#### Step 2

The distances between A and B should be exact. (As in diagram)

## Operation Manual

Note: Please read the information regarding suitable positioning, before operating.

### Turn on Machine

1. Turn on the power switch, the LED light will glow.
2. The control panels default is set to "Manual"

### Select a Mode

1. Select "Choose Mode" and select the treatment required.
2. Temperature level, time and fan can be adjusted according to treatment.

### Start/Stop

1. The machine will start to heat as per the selected working mode, during this time the LED control panel will glow.
2. The LED will continue to glow until the machine stops.
3. The arms will start movement and heating

### During Operation

1. The start/stop, temperature and time indicators LED will continue to light during operation.
2. During the working mode you may alter the time and temperature by using the time/temp buttons.

### Changing Current Mode

1. Push the "start/stop" key to interrupt the treatment. The arms and indicator light will enter standby mode.
2. The modes and temperature levels will shine after you have reselected a new programme.
3. Time light will be off and the indicator will show the preliminary set time.
4. Select the new mode you wish to switch to then select the "start/stop" key. The machine will now resume with the new selected mode.

### Finish Treatment

1. The control panel will sound when the treatment has come to an end.
2. The arms will automatically move back to the default position and stop heating.
3. Start/Stop and Indicator light will turn off.
4. The modes and temperature levels will glow.
5. The digital time indicator will show as "0" when the machine has finished operation. The time light will then flash once per second to start counting down any extra time.

### Turn Off Power Source

1. Turn off machine by the power switch.
2. Please pull out the power plug, if machine is not in use for a long period of time

Note: During operation, the fan can be turned on/off at your will. The machine can resume to original position when the set time is up. The control panel will sound and the time will indicate as "00" and begin to re-calculate the time.

## Cautions

1. Avoid use in extreme hot or cold temperatures.
2. Please use correct power source

4. Dry hands before use.

5. Do not touch during operation – Hot Surfaces.

6. Do not move or lift product when in use.  
This could damage the machine as well as causing damage to customer/stylist.

## Cautions

1. Before using please make sure that the service voltage is the same as the products appropriate rating.
2. Operating environment; an ambient temperature of 5'c -40'c; a relative humidity of less than 95%.
3. To ensure users safety, never insert foreign objects into the machine.
4. Be sure never to use flammable gas or use machine under similar environments.
5. After switching on the power; if you find any abnormal conditions, please contact the technical department immediately – do not attempt to repair yourself.
6. Don't remove the plug by pulling the cable. Please first hold the plug then pull.
7. This machine is strictly prohibited to use outdoors/outside.
8. If the cable is found to be damaged, in order to avoid danger, it should be replaced by the manufacturer.
9. Water must be purified. Don't add or use any cosmetic liquids, astringent, toning lotion, perfume, carbonated water or mineral water (un-pure tap water), otherwise that will induce the machines function and/or create a hyper susceptibility to customers skin.
10. Please keep children away from the machine when in use,
11. If you suffer from any medical condition, please consult your local GP before use.

## Maintenance

Before cleaning please remove the power cord

1. The inside of the machine helmet is easy to stain and get dirty, please clean this regularly. Chemicals such as hair dye etc can cause the machine to dysfunction.
2. Use a soft, dry cloth to wipe and clean. If water/liquids splash onto the control panel, use a soft dry cloth to remove immediately, otherwise this could also cause the machine to dysfunction.

**Attention !:** Please do not use the following substances to clean: thinner, alcohol, gas, coal, oil or any other harmful chemicals

Thinner or Benzene

Neutral detergent
