## 3. Precautions

Read this manual carefully before installation, operation and adjustment. And please keep it well.

This Electric beauty bed is equipped with a three-wire power cord. The power cord must be plugged into an three-hole outlet which is properly installed and grounded. This is not only to prevent the risk of electric shock, but also ensure bed work properly.

When adjusting the backrest, seat cushion, footrest or lifting of the whole bed by manual controller or foot control switch, please keep your hands, feet and head away from the position 1.2.3.4.5.6 showed on below photo to avoid getting jammed.

While controlling the lifting of the whole bed, the button must be pressed continuously until the bed be in a suitable position.

Please pay attention that the input frequency should be  $M_s \times 6\text{min/h}$  when operating the motor.

Maintenance should be processed by trained professionals.

After each treatment, please use neutral reagent to clear the dust, stains on leather or on plastic cover.

#### 4. Structure of electric beauty bed

Heating	Heating (optional)	Pressing the button, the heating function works; press the button agin, the heating function stops.

## 8. Technical Parameters

Product size	1985 (L) × 740 (W) × 670 (870) (H) mm (±10mm)
Package size	2040×810×720mm (±10mm)
The highest position	870±10mm
The lowest position	670±10mm
Angle adjustment of the backrest	0° ~+65° ±2%
Angle adjustment of the footrest	0° ~+25° ±2%

Angle adjustment of the whole bed	$-10^{\circ} \sim 10^{\circ} \pm 10\%$
Net weight	92.75 kg
Gross weight	111.75kg
Power	AC 100~120V , 50Hz/60Hz OR AC 220~240V, 50Hz/60Hz
Maximum power	300W
Environment temperature	$0^{\circ}\text{C} \sim +40^{\circ}\text{C}$
Relative humidity	30%~90%
Lifting rated load	175 kg

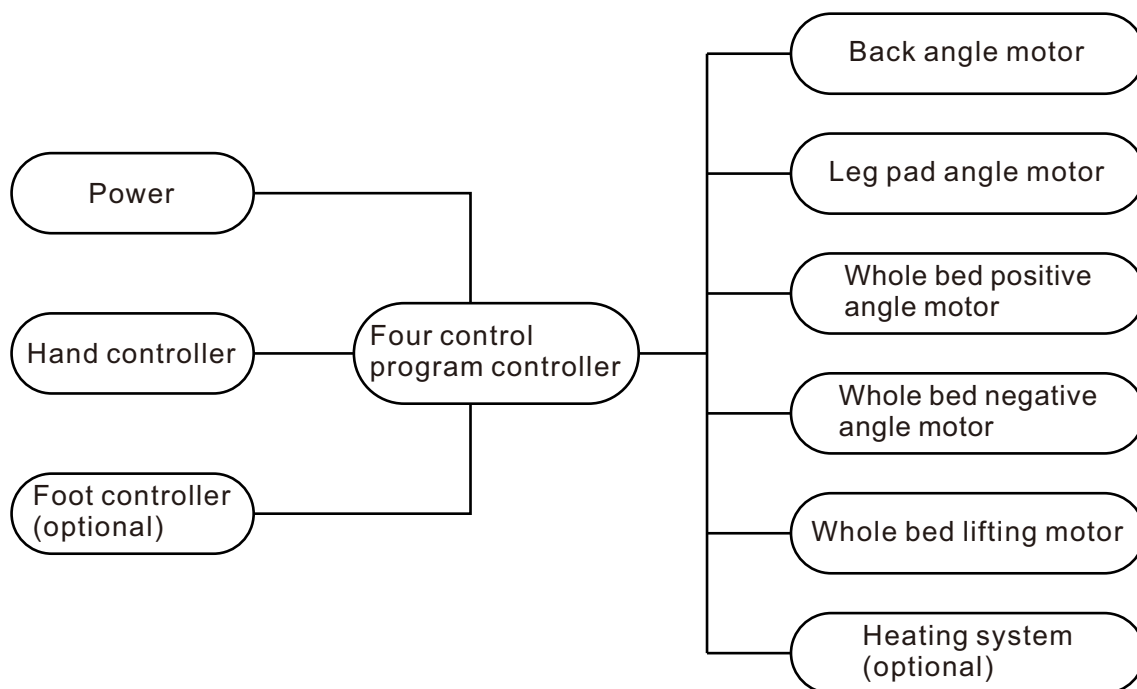

## 9.Maintenance

After every treatment, please use neutral reagent to clear the dust, stains on leather or the plastic cover. This is to prevent premature aging of the leather and plastic cover.

## 10.Circuit system connection diagram

AC 100~120V , 50Hz/60Hz OR AC 220~240V, 50Hz/60Hz

## 11. Troubleshooting

The fault phenomenon	Reason	Solution
Can't go up or down normally	1. The power cord is unconnected or not plugged well	1. Connect the power cord or plug it well
	2. Poor quality of the manual controller	2. Replace the manual control panel
	3. Poor quality of the foot control switch	3. If problem is still not solved after replacing the manual controller or foot control switch, please contact maintenance center or supplier to clear the trouble.
	4. Poor quality of the controller box	
	5. Rupture of motor tail	
	6. Motor detonation	
Abnormal sound	1. The rotating parts lack of lubricating oil	1. Add lubricating oil
	2. Rotating position (such as hinge, P, O, M sets) Lack of lubricating oil	2. Add lubricating oil
	3. Motor quality problems	3. Replace the motor
