

PARAGON ECLIPSE STEAM COLOR PROCESSORS

The PARAGON Eclipse Steam Color Processor (Hair Steamer) has been the go-to choice of moisture-injection and chemical treatment salon specialists. The Eclipse produces moist heat to accelerate treatment processes and enhances permanents, colors, and deep condition without drying out delicate hair cuticles. The ventilated hood allows the stylist to adjust the concentration of steam to each treatment's requirement.

The Eclipse is available in everyday-versatile Rollerstand (750) and space-saving Wall-Mount (750WM) setups.
