Massage chair assembly: (See details in chair user's manual)

Drain line installation:

Warning

The Spa must be installed by a qualified, licensed plumber. Failure to comply may result in serious injuries and Warranty will be voided.

- **Gravity drain:**
SpaZi spa uses a standard gravity drain. A floor drain is recommended P-Trap is supplied.
- **Dis charge pump:** (Optional)
Discharge pump is installed by manufacturer

Safety instruction

Caution: Basic precaution must always be observed, including the followings:

Those with the following conditions, but no limited to, should consult with their physician prior to using this product:

- A - Malignant tumor
- B - Heart disease
- C - Conditions requiring rest
- D - Back disease or back trouble from injury by accident.

- Always enter and exit the pedicure spa slowly and carefully.
- Do not permit children to use this unit unless they are supervised at all time.
- Do not use outdoors
- Make sure all operation switches are in OFF position before connecting the power cord to an electrical outlet.

Warning

Grounding instructions and methods

We strongly recommend that all electrical outlets connected to the pedicure spas to include a GFCI device (Ground Fault Circuit Interrupter) in order to reduce the risk of electric shock.

In the event of break down or malfunction, the grounding provides a path of the least resistance for electrical current to reduce the risk of electric shock.

Operation and use

1 - Fill Sink:

Your SpaZi Spa is provided with a single hot and cold mixing valve, located on the Front of the Spa. This is pressure balance valve that requires you to lift the handle to start the water flow and turn the valve to the temperature level desired. Fill water until the jet motor is completely submerged

2 - Start

Press ON/OFF power button, located next to the footrest or on the side of the crystal tub, to turn jet motor and Spa light. To stop the whirlpool function, press the button again.

3 - Adjust air control

The air control button is situated on the Spa base, just under the chair. You can control the supply of air to the jet motor by turning this chrome knob in a clockwise direction.

4 - Hand shower

The SpaZi Spa is equipped with a self held sprayer, located on the side of the footrest or the crystal tub.

To activate the hand shower pull the hand shower, lift handle of hot and cold mixing valve and depress the thumb control on the sprayer handle.

5 - Adjust footrest

For regular tub spa

The SpaZi spa allows you to adjust the height of the footrest by lifting its front end up. To have the footrest back to the normal position, push the footrest side way (see picture)

For crystal tub spa

Adjust the height of the footrest by lifting the footrest handle from the inner side of the footrest. To have the footrest back to the normal position, lower the footrest handle to its original position

6 - Drain whirlpool sink

A - Gravity Drain

Open the drain plug by turning the control knob on the far right of Spa base.

B- Discharge pump (Optional)

Open the drain plug by turning the control knob. Press discharge pump button, located on front side of spa base.

7 - Massage chair

Please see chair User's manual for operation and use of the chair.

Cleaning & Maintenance

Pedicure Spa owner should always contact your local governing agency for their specific cleaning, disinfecting requirements and regulations for pedicure spas. For your clients safety, always use the regulations as a minimum standard for cleaning and disinfecting. Combining your state's standards with the regimen listed below may provide your clients with a safe and healthy pedicure spa environment experience.

See Exhibit A for the completed list of state board contacts.

Below is the recommended Cleaning and Disinfection Procedures for Foot Spa Basins in Salons by Environmental Protection Agency (EPA) - December 2006

Customer precautions - protecting the client

1. **Check the condition of the client's feet and legs:** If open sores or skin wounds are present (including insect bites, scratches, scabbed-over wounds, or any condition that weakens the skin barrier), explain to the client why they should not use the foot bath.
2. **Complete pedicure or wax after the foot bath soak:** Any procedure that risks damage to a client's skin should not be done before soaking feet in the foot spa basin.

Step by step instructions for disinfecting pedicure foot spa equipment

After Each Client: (this can take place any time after the client's feet are out of the footbath, while feet are massaged, toes are painted, or other opportunities).

1. Drain the water from the foot spa basin or bowl and remove any visible debris.
2. Clean the surfaces of the foot spa with soap or detergent, rinse with clean water, and drain.
3. After cleaning, disinfect * the surface with an EPA-registered hospital disinfectant (for description) according to the manufacturer's directions on the label. Surfaces must remain wet with the disinfectant for **10 minutes or the time stated on the label**, which may be shorter.
 - * For whirlpool foot spas, air-jet basins, "pipe-less" foot spas, and other circulating spas: It is best to disinfect by filling the basin with clean water, adding the appropriate amount of liquid disinfectant, and turning the unit on to **circulate** the disinfectant for the entire contact time.
4. After disinfection, drain and rinse with clean water.
